==========Only for TE SS class===

Instructions to perform Salesforce assignments in CC.

[This is only for TE SS class. Other classes have performed these assignments in different way. So, avoid discussing with them]

CC Assignment 03

To write a program in SalesForce.com using Apex programming Language to get a desired output. (eg. Accounts)

Instructions:

1.In this assignment you have to write any salesforce Apex program to get output (Specially without GUI)

2. Here you can perform Insert, update and delete operations and display them.

   Check the record which has been successfully added/updated/deleted in logs.

3. No need of GUI here. (means no need of .vfp file)

4. Following steps you can follow for assignment 03.

https://studyber.com/creating-an-application-in-salesforce-com-using-apex-programming-language/

CC Assignment 04

To write an application in SalesForce.com including UI using Apex programming Language to get a desired output. Make use of Visualforce Pages.

Instructions:

1. Here, you have to perform apex program using GUI.
2. We have used same Create Account application here.
3. You can refer the pdf shared with name **CC Assignment 04.pdf**
4. In this assignment you will use files like CreateAccount.apxc and CreateAccount.vfp.
5. .vfp file means GUI i.e form is needed.
6. Other classes (TE1 and TE2) have performed calculator program for this assignment. But, TE SS can perform using CreateAccount.apxc and CreateAccount.vfp as per pdf shared. Those who are comfortable with calculator GUI program they can implement that too.

Hope this clears up your confusion!

Still for any doubt, you can whatsapp or mail on anand.dhawale@mescoepune.org
